

DNA TEST RESULTS

ISAG institutional member no. 129553

Testing requested by:

Mrs Milena Chalupova Vendoli 14 569 14 Vendoli CZECHIA

Report date: 21 January 2022

Dog Breeding Science

40 Boronia St Redfern NSW 2016 AUSTRALIA

ABN: 65 117 439 586

Dog details

Name: Almighty Afraa Out Of Mind

 Stud book ID:
 CMKU/AKE/609/20

 Microchip:
 941000024828949

Sire: Furtus Fueco Dai Muratori
Sire registration: CMKU/AKE/409/16/20

Dam:Brown Baireen KimbilioDam registration:CMKU/AKE/387/16/20

Date of birth:3 August 2020Sex:FemaleColour:Red

Analysis details

Sample received: 12 January 2022

Analysis started: 21 January 2022

Analysis complete: 21 January 2022

Laboratory sample ID: DBS21018551

Pedigree

A DNA profile has not been requested.

Appearance and health

Almighty Afraa Out Of Mind is a CEA carrier. It is good breeding practice to make sure this dog is not mated to any other dogs that are carriers for the same disorder(s).

Potential mates should be DNA tested to find out their carrier status. Keep in mind the turnaround time for DNA testing when organising your breeding.

Test	Genotype	Comments
Intestinal lipid malabsorption	n n	Negative for intestinal lipid malabsorption (ILM)
* Degenerative myelopathy	n n	Negative for degenerative myelopathy
* Cerebellar abiotrophy marker (LINGO3)	СС	Negative for the CA: LINGO3 marker
* Cerebellar abiotrophy marker (VMP1)	СС	Negative for the CA: VMP1 marker
* Collie eye anomaly	CEA n	Positive for Collie eye anomaly, one copy (CEA carrier)

^{*} These tests are marker tests. We classify a test as being a marker when it does not cause that trait, but is statistically associated with it. This means that in a minority of cases an animal can test negative but still have the trait, or conversely test positive but still lack the trait. Some tests are classified as markers because environmental triggers are required to make the trait apparent.
